

SAT BOOTCAMP · SUMMER 2026 COHORT

Welcome to the *cohort*.

You're in. Welcome to a summer built around the score the student actually needs — not a generic target.

GOAL

What this *is*

A live-taught cohort, diagnostic-first, capped at fifteen students so the room stays personal. The class follows what the diagnostic reveals — no generic curriculum, no one-size-fits-all pacing.

What we're aiming *for*

A score that opens doors.

The score the student needs for the universities they're applying to — not a one-size number.

Habits that travel.

Pacing, problem-recognition, and the test-day routine the student carries beyond the SAT.

A real classroom.

Fifteen students. Two live sessions a week. Recordings every time. Peer momentum the whole way through.

About Himmah *Prep*

A small prep and admissions practice for Gulf students aiming for top universities in the U.S., U.K., and Canada. We've been through the same applications process at the schools our students apply to — and built this bootcamp to be the prep we wish we'd had: small, specific, taught with intention.

BEFORE WEEK 1

Save the *links*.

The Google Meet link

Use this for **every** session — save it now:

meet.google.com/kbb-phcr-nkr

Join five minutes early. A laptop with a stable connection works best.

The cohort WhatsApp

Reminders, session recordings, and quick technical help — Zoom or Meet issues, the diagnostic link, anything logistical. We'll be in there checking in. Substantive SAT questions are best brought to the live sessions.

Questions before the 26th?

Write to connect@himmahprep.com or reply to the email this pack came with. We'll get back within one business day.

The diagnostic

Before Week 1, the student will sit a full-length diagnostic at home. It gives us a baseline so we can track real progress through the cohort — and lets the class focus on the gaps it reveals.

The link and instructions go out a few days before the cohort starts. Have a quiet space, laptop, and notepad ready.

The 8-week arc

01 Weeks 1-2 · Foundations

Math: algebra core. English: passage strategy. Suggested practice: diagnostic follow-up questions.

02 Weeks 3-4 · Problem solving

Heavier math content and the inference work that separates 1400 readers from 1500+ readers. Suggested practice: timed sets.

03 Weeks 5-6 · Mechanics

The grammar rules and geometry shortcuts most students were never explicitly taught. Suggested practice: targeted drills.

04 Weeks 7-8 · Test-day

Pacing strategy, mock debriefs, and the test-day routine the cohort runs on the morning. Suggested practice: full-length mocks at home.

A few small things to know

Attendance. Sessions are 90 minutes. If a student misses one, the recording goes into the WhatsApp group within 24 hours.

Practice. Roughly 2-3 hours a week of suggested questions. We don't grade — it's there to keep reps consistent. Honest effort beats marathon cramming.

See you on the *26th*.
